

## Non-Glass Sight Glasses (NGSG)

The NGSG for hygienic applications uses a transparent FEP tube and stainless steel ends. The ends are swaged to provide a crevice-free bore throughout with the FEP tube providing a rugged, shatterproof enclosure. A variety of hygienic end fittings can be supplied with the unit to suit customer requirements.

### Features

- Constructed from FDA-approved materials with 316 Stainless Steel or FEP in contact with the product, using hygienic fittings
- Shatterproof sight tube for maximum safety
- Uses the flexi-Rite 7000 swaging system for crevice-free fittings connection
- Length to suit customer requirements
- Available with or without guard
- Materials of construction suitable for hygienic use
